New Jersey
State and Local Health Equity Policy Checklist
July 2021

Legislative Reform

POLICY | SCORE | NOTES
--- | --- | ---
Implement Racial Equity Impact Statements for legislation at the state or local levels, including environmental, health and criminal justice areas. | ✔️ | New Jersey requires its Office of Legislative Services to prepare racial impact statements for policy changes affecting pretrial detention, sentencing and parole in order to address racial disparities in the state's prison system. However, as of 2020, New Jersey legislative staff members have only crafted one such analysis. Experts note that the directive was broadened before passage, which impedes the implementation of the law.

Expand Health Impact Assessments attached to state and local legislation to include equity considerations. | ✗ |

State Health Planning & Programs

POLICY | SCORE | NOTES
--- | --- | ---
Declare racism a public health crisis and implement steps to address it. | ✗ | One or more cities/counties within a state has declared racism a public health crisis and has implemented steps to address it, but it has not been done at the state level.

Montclair’s mayor and town council have declared racism to be a public health crisis and committed to implement evidence-based policies and programming that address racial health inequities and engage with historically marginalized communities in problem identification and policy creation, among other goals.

The mayor and Council of Leonia declared racism a public health crisis and committed to enhance educational efforts on racism and its impact on the delivery of government services; encourage racial equity training among all community partners, vendors and contractors; and called upon the Governor, state Senate President, and state Assembly Speaker to declare racism a public health crisis.

New Jersey’s legislature considered an assembly resolution (AR 175) to declare racism a public health crisis during the 2020-2021 legislative session, and introduced legislation to create a Task Force on Institutional Discrimination in Health Care and a New Jersey Reparations Task Force. As of May 2021, the bills had not been passed.

Summary and scoring methodology reports are available at www.HealthValueHub.org/Health-Equity-Checklist.

| Develop a ‘Health in All Policies’ strategy at the state or local level. | ✔️ | “Health in All Policies” is a core component of New Jersey’s 2020 State Health Improvement Plan. The document states that the Office of Health Equity will support state and local partners as they pursue a “Health in All Policies” agenda by:  
• identifying regulatory, legal and policy obstacles and opportunities to strengthen health equity;  
• providing data to identify short-term and long-term priorities; and  
• ensuring the active participation of diverse communities in policy decisions.  
Trenton lists the creation of a “Trenton250 Health in All Policies Plan” as a strategic priority in its 2016 Healthy Trenton: Blueprint for Action. |
| Establish Health Equity Zones to better address social determinants of health. | ✗ | New Jersey’s Health Enterprise Zones initiative offers tax incentives for physicians and dentists to establish and maintain practices in state-designated medically underserved areas. |
| Create an Equity Strategic Plan to lay out how the state (or local entity within the state) will reduce health disparities. | ✔️ | Developing and implementing a comprehensive, coordinated plan to reduce health disparities between white and racial and ethnic minority populations in New Jersey is a priority for the Office of Minority and Multicultural Health’s Eliminating Health Disparities Initiative. Additionally, the Department of Health and Senior Services released a “Strategic Plan to Eliminate Health Disparities in New Jersey” in 2007, but does not appear to have updated the report since. |
| Fund community-driven health equity action plans. | ✗ | Freehold Borough was the first municipality in New Jersey to implement participatory budgeting, allowing residents ages 14 and older to submit and vote on proposals for how to spend $200,000 in taxpayer dollars. Funded projects related to social determinants of health include improvements to sidewalks, construction of pedestrian bridges, installing lighting at sports fields, tree replacements, and refurbishing basketball courts. Freehold Borough was the first municipality in New Jersey to implement participatory budgeting, allowing residents ages 14 and older to submit and vote on proposals for how to spend $200,000 in taxpayer dollars. Funded projects related to social determinants of health include improvements to sidewalks, construction of pedestrian bridges, installing lighting at sports fields, tree replacements, and refurbishing basketball courts. West Orange and Neptune City have also employed participatory budgeting. |

Implement participatory budgeting at the state and/or local level for initiatives that focus on health and social determinants of health. | ✗ | One or more cities/counties within a state have implemented participatory budgeting for initiatives that focus on health and social determinants of health in the past. |
### Emphasize health disparities and equity when developing State Health Assessments & State Health Improvement Plans

New Jersey’s 2018 State Health Assessment describes disparities in prioritized health topics and identifies organizational, local and state actions to identify and reduce disparities. The 2020 State Health Improvement Plan places strong emphasis on describing health equity and disparities, and presents an action plan to advance health equity in the state. The Department of Health’s State Health Assessment Data System tracks disparities in Healthy New Jersey 2020 objectives and has developed targets for the four largest racial/ethnic groups in the state.

Additionally, equity will be integrated into all aspects of the Healthy New Jersey 2030 framework, objectives and planning processes.

### Fund community-based organizations operating in the state to reduce disparities and/or provide culturally competent health-related supports.

The New Jersey Health Department’s Office of Minority and Multicultural Health awards Health Disparity Prevention Grants. For FY 2020, grants were provided to community- and faith-based organizations, local public health departments and non-profits to target health disparities related to obesity, diabetes, youth violence, chronic disease self-management and diabetes self-management, cardiovascular diseases, infant mortality, Alzheimer’s Disease and tobacco use.

Despite the actions described above, experts have noted that state grants are frequently awarded to agencies that do not adequately serve communities of color. To address this issue, advocacy organizations recommend that Culturally and Linguistically Appropriate Services (CLAS) standards be considered when awarding state grants to non-profits serving Latino communities.

### Implement strategies to address specific health outcomes related to inequality in social determinants of health, such as asthma, diabetes, heart disease and maternal mortality, among others.

In 2004, New Jersey established the Eliminating Health Disparities Initiative within the Office of Minority and Multicultural Health, creating priority areas for the office to develop and implement a comprehensive, coordinated plan to reduce health disparities. The health disparity priority areas include: asthma; breast, cervical, prostate and colorectal cancer screening; cardiovascular disease; diabetes; Hepatitis C; HIV/AIDS; immunizations; infant mortality; accidental injuries and violence; kidney disease; obesity; and sexually transmitted diseases.

The Nurture New Jersey 2021 Strategic Plan is the First Lady of New Jersey’s initiative to reduce maternal and infant mortality and morbidity and ensure equitable care and outcomes for New Jersey mothers and infants. Action areas include increasing racial equity and addressing social determinants of health. Additionally, New Jersey’s Department of Health has implemented a doula program in municipalities with high Black infant mortality rates.

### Health Reform – Delivery

<table>
<thead>
<tr>
<th>POLICY</th>
<th>SCORE</th>
<th>NOTES</th>
</tr>
</thead>
</table>
| Develop Medicaid Managed Care Organization (MCO) contract options for advancing health equity and recommend or require MCOs to complete specific health equity responsibilities. | ![Checkmark] | New Jersey requires MCOs to complete various quality assurance activities, including developing a program to identify, prevent and reduce healthcare disparities. At a minimum, the program must include:  
- evidence of a process to identify and evaluate healthcare disparities within the MCO, by subgroups including gender, race, ethnicity, primary language, geographic location and disability status;  
- a barrier analysis and a written action plan to address the disparities identified;  
- implementation of an action plan with continuous monitoring of outcomes; and  
- ongoing evaluation of the action plan’s effectiveness.  
MCOs must also: participate in Performance Improvement Projects, at least one of which must include activities that identify and reduce healthcare disparities; screen enrollees for social needs; provide enrollees with referrals to social services; and partner with community-based organizations or social service providers. |
| Encourage or require Accountable Care Organizations (ACOs) and/or Coordinated Care Organizations (CCOs) to collect equity-focused data, adopt culturally appropriate programs, implement partnerships with community-based organizations in areas with larger minority populations and/or focus on addressing social determinants of health. | ![Ellipsis] | New Jersey established a Medicaid ACO Demonstration project in 2011, but ended experimental Medicaid ACOs in 2019. |
| Employ Medicaid 1115 and/or 1915 waivers to better address the social determinants of health. | ![X] | |
| Require or incentivize providers participating in Medicaid value-based programs to report on measures related to health equity/disparities. | ![Checkmark] | New Jersey’s MCO contract requires audits by an External Quality Review Organization, which include onsite reviews of the MCO’s operations, including efforts to reduce healthcare disparities. |

</thead>
<tbody>
<tr>
<td>Expand coverage for telehealth services.</td>
<td>✔</td>
<td><strong>New Jersey requires</strong> NJ Medicaid and NJ FamilyCare programs to cover telehealth services on the same basis as equivalent services delivered in-person. However, the programs may limit coverage to services delivered by participating healthcare providers. Private insurers must also provide coverage for health services delivered via telehealth on the same basis as equivalent services delivered in-person. However, a healthcare plan may limit coverage to services that are delivered by in-network providers and is not prohibited from covering only services that are medically necessary, subject to the terms and conditions of the plan.</td>
</tr>
<tr>
<td>Establish or strengthen telehealth reimbursement parity laws to incentivize providers to deliver these services.</td>
<td>❌</td>
<td><strong>New Jersey requires</strong> NJ Medicaid, NJ FamilyCare and private insurers to reimburse providers on the same basis as equivalent in-person services. However, reimbursement for telehealth services may not exceed reimbursement rates for equivalent in-person services. A bill (SB 2559) that would require payment parity by NJ Medicaid, NJ FamilyCare and private insurers was introduced in the 2021 legislative session. As of June, the bill had passed the House and Senate.</td>
</tr>
<tr>
<td>Establish cost-sharing parity for telehealth services</td>
<td>✔</td>
<td>NJ Medicaid, NJ FamilyCare and private insurers may not charge any deductible, copayment or coinsurance for a telehealth healthcare service in an amount that exceeds those applicable to an in-person consultation. New Jersey’s governor issued an Executive Order requiring carriers in the individual, small and large group markets to cover, without cost-sharing, any healthcare services or supplies delivered or obtained via telehealth for the duration of the State of Emergency.</td>
</tr>
<tr>
<td>Adopt a global budget system for paying hospitals to better enable them to focus on prevention, care coordination, community-based integration and social determinants of health.</td>
<td>❌</td>

<table>
<thead>
<tr>
<th>POLICY</th>
<th>SCORE</th>
<th>NOTES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Require workplace-based cultural competency and implicit-bias training for clinicians and other providers.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The state requires either cultural competency or implicit-bias training for clinicians and other providers, but not both.

New Jersey requires the state’s Board of Medical Examiners to prescribe requirements, by regulation, for physician cultural competency training. Further regulations require all medical schools in the state to provide cultural competency instruction, in addition to Continuing Medical Education instruction for licensed physicians who did not receive cultural competency training in their curriculum.

A bill (SB 703) signed by the governor in 2021 requires all healthcare professionals who provide perinatal treatment and care to pregnant people at hospitals or birthing centers to undergo explicit and implicit bias training to help them identify and overcome racial and cultural prejudices.

### COVID-Specific Reforms

<table>

<tr>
<th>POLICY</th>
<th>SCORE</th>
<th>NOTES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Collect racial equity data to better understand the disparate impact of COVID-19.</td>
<td>✔</td>
<td>New Jersey reports data on COVID-19 vaccinations, cases, mortality and hospitalizations by race and ethnicity, but not COVID-19 testing or recoveries.</td>
</tr>
</tbody>
</table>

Implement changes to Medicaid enrollment, including but not limited to presumptive eligibility, cost-sharing provisions, special enrollment periods, increased enrollment assistance and improvements to application processing in response to COVID-19.

New Jersey expanded presumptive eligibility and extended its special enrollment period in response to the COVID-19 pandemic. The state also extended the timeframe for families to complete Children’s Health Insurance Plan (CHIP) renewals and waived, eliminated, suspended or delayed enrollment fees, premiums or similar charges in CHIP.

Leverage the Emergency Medicaid program to extend COVID-19 testing, evaluation and treatment coverage to undocumented immigrants.

New Jersey does not cover COVID-related testing or treatment through Emergency Medicaid, however free testing and treatment is available at Federally Qualified Health Centers (FQHCs) to all people regardless of insurance or immigration status.

Waive or limit cost-sharing for COVID-19 testing and treatment by private insurers.

New Jersey passed a law in 2020 requiring private insurers to cover COVID-19 testing that was ordered by a medical practitioner, with no cost sharing imposed on this coverage.

Provide COVID-19 testing to residents free of charge.

New Jersey sponsors public testing sites where residents can receive COVID-19 tests free of charge.
