Polling data repeatedly shows that healthcare affordability is the number one issue that state residents, on both sides of the political aisle, want their policymakers to work on. This checklist identifies areas where Pennsylvania is doing well and areas where it can improve.

### 1. Curb Excess Healthcare Prices:

- **• Implement free, public-facing healthcare price transparency that reflects negotiated rates and features treatment- and provider-specific prices.**
  - Not implemented by state
- **• Create an all-payer or multi-payer claims database to analyze healthcare price inflation, price variation and utilization.**
  - Not implemented by state
- **• Create a permanently convened health spending oversight entity.**
  - The state has implemented policies, but could improve
- **• Create all-payer healthcare spending and quality benchmarks for the state.**
  - Not implemented by state

### 2. Reduce Low-Value Care:

- **• Require validated patient-safety reporting for hospitals.**
  - Implemented by state
- **• Universally implement antibiotic stewardship programs using CDC’s 7 Core Elements.**
  - Implemented by state
- **• Analyze claims and EHR data to understand how much is spent on low- and no-value services.**
  - Not implemented by state

### 3. Extend Coverage to All Residents:

- **• Expand Medicaid to cover adults up to 138% of the federal poverty level.**
  - Implemented by state
- **• Provide high-quality, affordable coverage options for people whose incomes are too high to qualify for Medicaid, e.g., Basic Health Plan, reinsurance or augmented premium subsidies.**
  - Not implemented by state
- **• Provide options for immigrants that don’t qualify for the coverage above.**
  - The state has implemented policies, but could improve
- **• Conduct strong rate review of fully insured, private market options.**
  - The state has implemented policies, but could improve

### 4. Make Out-of-Pocket Costs Affordable:

- **• Protect patients from inadvertent surprise out-of-network medical bills.**
  - Not implemented by state
- **• Limit the availability of short-term, limited-duration health plans.**
  - Not implemented by state
- **• Waive or reduce cost-sharing for high-value services.**
  - Not implemented by state
- **• Require insurers in a state-based exchange to offer evidence-based standard plan designs.**
  - Not implemented by state

Notes

1. PA has a healthcare spending oversight entity that targets hospital spending. In 2020, PA reauthorized and expanded the Pennsylvania Health Care Cost Containment Council (PHC4) to look at regional trends in the cost of health care and health insurance premiums.

2. PA’s Governor created the Interagency Health Reform Council in 2020 to address whole person health reform. The Council released recommendations in 2021, which include creating a Health Value Commission to institute healthcare cost benchmarking. See: https://www.media.pa.gov/pages/dhs_details.aspx?newsid=647. In addition, Pennsylvania is experimenting with voluntary global budgets for rural hospitals through their “Rural Health Model,” but the program is not truly “all-payer.”

3. Central line-associated bloodstream infections (CLABSI) and catheter-associated urinary tract infections (CAUTI) are two common forms of hospital-acquired infections. Pennsylvania mandates both patient safety reporting and validation for CLABSI/CAUTI. For more information, see: https://www.cdc.gov/hai/data/portal/progress-report.html#Data_tables.

4. 94% of PA hospitals have adopted antibiotic stewardship. For more information, see: https://www.cdc.gov/antibiotic-use/stewardship-report/current.html.

5. Looking Ahead: Pennsylvania will operate a 1332 waiver funding a reinsurance program beginning in 2021. They also implemented an Easy Enrollment program in 2020 to reduce enrollment barriers.

6. PA offers Medicaid coverage to lawfully residing immigrant pregnant women and children without a 5-year wait. PA does not offer Medicaid coverage for undocumented children/pregnant people/adults.

7. PA has effective rate review as classified by CMS, but does not incorporate affordability criteria into rate review.

8. PA has partial protections against surprise medical billing. (PA’s SMB protections are uniquely limited, applying only to a narrow scope of plans). ‘Comprehensive’ surprise medical billing protections include emergency departments and hospitals, apply to all insurance types, hold consumers harmless/prevent balance billing and adopt adequate payment standard or dispute resolution process. States with only some of these policies have ‘partial’ protections. For more information, see: https://www.commonwealthfund.org/publications/maps-and-interactives/2021/feb/state-balance-billing-protections.

9. The federal No Surprises Act prohibits surprise medical billing in most plans effective January 2022. However, it does not cover ground ambulances which often result in surprise bills for consumers. An analysis by Johns Hopkins University conducted specially for Altarum revealed that 63% of ground ambulance rides in PA charged to commercial insurance plans had the potential for surprise medical billing.
